JOB APPLIED FOR

Computer systems designer and analyst

EDUCATION AND TRAINING

1996–2001

Perito aziendale e corrispondente in lingue estere

Istituto V. Fossombroni, Arezzo (Italy)

WORK EXPERIENCE

01/06/2009–Present

Freelance System Administrator

Rome (Italy)

I currently work as a freelance system administrator and I lead server project environments.

I provide technical support over complex frameworks, networks, and hosting services.

I normally am hired for virtualisation projects, network architectures, mail servers and VOIP Solutions. The expertise areas are very different due to the nature of my position.

01/01/2010–30/06/2016

Project Manager / System Administrator

Efisystem S.r.l., Milano (Italy)

Project manager and system administrator for the company which technically supports several Courts in Italy. Focused on virtualisation technology (XEN), I took care of the low level infrastructure, ensuring the quality and the availability of the services, and managing the administration policy.

01/03/2014–11/10/2014

GNU/Linux System Administrator

Gruppo Immobiliare.it S.p.A., Roma (Italy)

Project Manager for an italian luxury estate portal.

My project was to build a fully virtual and distributed staging framework for development team. I led a team of three persons. The technologies used were: Debian GNU/Linux on Dell Poweredge servers (Over vmware VSphere), LXC with vagrant provisioning, HAProxy for load balance, Apache, MySQL, Bacula as a backup service, and python for a useful web console. I also helped the sysadmin team with H24 availability during the summer season.

01/01/2012–Present

Founder

VPS Facile, Roma (Italy)

Creator and CEO of VPS Facile, an italian hosting company which currently sales domain names, VPS Servers, hosting spaces, and dedicated server. It uses hosting oriented technologies, such as WHMCS, SolusVM, IspConfig with full stack API support.

Among the services we also have server and service monitoring solutions, CDN storage, and invoice suite for freelancer. I tried to only use opensource software.

01/06/2009–15/01/2010 System Administrator

Gruppo Immobiliare S.p.a., Rome (Italy)

System administrator for a real estate portal with more than 1.000.000 click per month. My job was to supply the dev team and manage the entire network, scheduling jobs and backups, find strategies to optimize the throughput flow. The major technologies were Ldirector, Heartbeat 1/2, Corosync with Peacemaker, and DRBD for high availability of the service. The service was served from Apache and MySQL clusters (active/active and active/passive), Memcached and Solr and Postfix. My project was to build a fresh clustered network for www.assicurazione.it (now www.facile.it)

01/05/2008–30/04/2009 System Administrator

CPI Progetti S.p.a., Rome (Italy)

System administrator for a EU Project and leaded by the Italian Minister of Foreign Affair. Based in Iraq.

The goal was to build a strong network between the iraqi ministers in Baghdad, Nassirya and Erbil and provide them a suite of web applications in order to digitalize the public relations with Iraqi citizens. I had the opportunity to travel three times to Erbil in order to accomplish the on-site tasks: configure the hardware, the software, test the whole stack, and train the kurdish team. We developed a strong virtualised environment with XEN virtual machines, distributed over several physical servers and shared NAS storages.

2005–2007 System Administrator

Aruba S.p.a., Arezzo (Italy)

System administrator for the biggest hosting company in Italy. My tasks were to maintain the Linux hosting network and dedicated servers.

PERSONAL SKILLS

Mother tongue(s) Italian

Other language(s)

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production
